Network

FAS has a network of over 1000 construction management and construction consulting professionals throughout all 50 states, Mexico, Central and South America

Difference

All FAS construction management and consulting services include instant access to project information through online client reports

The Global Leader in Construction Risk Management

Due Diligence & Entitlement Work

FAS will work with the REIT or the development partner to ensure proper zoning, adequate access, utility availability, environmental and other due diligence concerns have been addressed and satisfied.

Property Condition Assessments (PCA)

FAS reviews the condition of an existing building and its surroundings prior to purchase or development to determine issues that may affect current value and projected maintenance and/or repair costs.

Construction Risk Management (CRM)

To minimize construction risk for lenders and investors, FAS's CRM services are typically performed as a three-part process including review of contract and design documents for adequacy in constructing the project; monthly construction site visits and photos; and project accounting with funds disbursement.

FAS offers the following CRM services:

- Initial Project Reviews (IPR)
 - Review of construction documents (plans and specifications, contracts, budgets, and schedules) for adequacy and completeness prior to closing a construction loan or beginning construction.
- Pay Application Reviews (PAR)
 - Monthly review and report of the progress of the work and recommendation on the contractor's application for payment.
- Funds Disbursement and Reconciliation
 - Review of subcontractor and supplier lien releases and invoice support, and the preparation of checks to the general contractor, subcontractors and suppliers.

Construction Management (CM)

FAS provides supervision and management of the construction phase of the project working as the representative for the REIT. FAS will act as a consultant to the REIT and oversee the work of single or multiple contractors.
